engagements two or
more days

Microsoft Partner
Gold Midmarket Solution Provider

Let Tuor Networks guide your staff and provide a health check for your Active Directory environment.

We will provide a senior consultant that is an Active Directory expert to work with your staff members. We will examine your current AD environment, detect any issues and deficiencies, and provide recommendations.

Health Check

With a senior Active Directory expert, we will examine your systems without any disruption to your network. We request that a single key customer staff member be dedicated to the health check so that we can perform knowledge transfer as well as gain further insight into the environment and the IT processes.

Training

The key to a successful AD Health Check is solid training and knowledge transfer with those who will continue to maintain and administer the environment. To this end, Tuor will provide highly focused personalized knowledge transfer throughout the engagement, explaining why and where the concerns are.

Customer Responsibilities

To ensure the success of this high-value, accelerated offering, customer cooperation will be a key to success. It is expected that the customer will:

- Provide access to all systems
- Provide a dedicated contact for the Tuor consultant to work with
