Introductory priced at $5,000 CAD

Microsoft Partner
Gold Midmarket Solution Provider

Let Tuor Networks guide your staff and implement Microsoft Exchange into your environment in just one week.

We will provide a senior consultant that is an expert with Exchange to work with your staff members. We will implement the system and will proceed as far as possible within the fixed time allotted.

Deployment
With a senior Exchange expert, the deployment can happen quickly without disruption to your network. All standard functionality will be enabled and can be further customized after you are comfortable with all the features. An accelerated design process will take place to ensure the business and technical needs are met.

Training
The key to a successful Exchange deployment is solid training and knowledge transfer with those who will continue to maintain and administer it. To this end, Tuor will provide highly focused personalized knowledge transfer throughout the engagement.

Customer Responsibilities
To ensure the success of this high-value, accelerated offering, customer cooperation will be a key to success. It is expected that the customer will:
- Provide all hardware and software
- Provide a dedicated server for Exchange running Windows Server
- Ensure backups occur on the production environment
- Provide a stable Active Directory environment
