**Introductory priced
at \$5,000 CAD**

Microsoft Partner
Gold Midmarket Solution Provider

Let Tuor Networks guide your staff and implement System Center Configuration Manager (SCCM) into your environment in just one week.

We will provide a senior consultant that is an expert with SCCM to work with your staff members. We will implement the system and will proceed as far as possible within the fixed time allotted.

Deployment

With a senior SCCM expert, the deployment can happen quickly without disruption to your network. All standard functionality will be enabled and can be further customized after you are comfortable with all the features.

Training

The key to a successful SCCM deployment is solid training and knowledge transfer with those who will continue to maintain and administer it. To this end, Tuor will provide highly focused personalized knowledge transfer throughout the engagement.

Customer Responsibilities

To ensure the success of this high-value, accelerated offering, customer cooperation will be a key to success. It is expected that the customer will:

- Provide all hardware and software
- Provide a dedicated server for SCCM running Windows Server
- Ensure backups occur
- Provide a stable Active Directory environment
