Servers are critical to your business operations. Want to insure that they are functioning optimally? We can help!

Overview

Time Allotted
- 2 hours per server

Deliverables
- Evaluation of current server infrastructure against a set of well-known products, security standards and best practices
- Proactively identify security flaws, performance bottlenecks and imminent issues
- Checks for updates to software, checking event logs, checking antivirus software best practices, checking for certificates, checking for software and hardware expirations, performance analysis and cleanup
- Verification that servers are meeting best practices and how to plan for the desired future state (roadmap)
- Review of Microsoft specific services such as SQL, Exchange, Backup and Terminal servers
- Checklist of all items reviewed, deficiencies found and suggested next steps for ramifications in a written report

Introductory priced at $200 CAD per server

Microsoft Partner
Gold Midmarket Solution Provider

Let Tuor Networks guide your staff and provide a health check for your server infrastructure.

We will provide a senior consultant that is a Microsoft infrastructure expert to work with your staff members. We will examine your server infrastructure, detect any issues and deficiencies, and provide recommendations.

Health Check
With a senior server infrastructure expert, we will examine your systems without any disruption to your network. These health checks are designed to be efficient, concise, and recurring if necessary in order to clearly identify specific issues and recommend immediate steps for remediation.

Written Report
The key to a successful Network Infrastructure Health Check is to be able have a secure and reliable environment. To this end, Tuor will provide a written report that will include items reviewed and a list of recommendations, explaining why and where the concerns are.

Customer Responsibilities
To ensure the success of this high-value, accelerated offering, customer cooperation will be a key to success. It is expected that the customer will:
