

# Introduction to Tuor Networks Incorporated

Enterprise Quality Consulting for Small and Medium Business

Tuor Networks Inc. is a Toronto based, privately held corporation specializing in Microsoft client and server products.

Our staff has extensive experience in planning and deploying Microsoft Server products, support, networking, training and security. This includes the Microsoft workstation line of products including all Windows clients as well as the entire line of Windows Server products: Windows Server, SQL server, The entire System Center line (Operations Manager, Configuration Manager), IIS, Office 365 and Exchange server. We are also experts in all cloud technologies.

We tailor to small and mid sized companies, but all of our staff have experience in Enterprise sized environments, so you will never outgrow us. Small to medium sized enterprises have greater challenges due to budgetary and staff constraints. We help to ensure that any decision that is made is the right one as well as the most cost effective one.

Decisions about technology are no longer simple. We can guide you through the options and lead you to the correct one. We always strive to find the solution that best fits your business, rather than having your business fit a particular solution.

We can work with your existing IT staff as required on special projects, complicated migrations or even as an extra set of hands when staff is very busy. We also offer completely outsourced IT solutions, tailored to your needs.

Our motto is knowledge, accountability, dedication, security. We always keep these in mind with everything we do.

Many people ask us about our name, Tuor as it is quite unique. Tuor is Latin meaning "to protect, to watch, to uphold, to guard, to secure". We feel it is a fitting name for a company that provides IT services today.

Tuor Networks Inc. prides itself on client satisfaction. We have molded our core values around what we feel is the best for our clients. We are always courteous, professional and clear when dealing with customers.

Please contact us if you would like to correspond with any of the references below.

"Tuor Networks has been assisting us with our IT support and projects since 2003. They have always helped to guide us through our technology decisions."

**Bruce Bowser**, President  
AMJ Campbell Van Lines

"Tuor has worked with the Canadian Breast Cancer Foundation to upgrade our email system to Exchange 2007. Their staff and management have been exceptionally responsive and most helpful throughout the migration. It was the easiest transition in technology we have ever experienced."

**Paul Jackson**, Director of IT  
Canadian Breast Cancer Foundation

"Tuor Networks led us in moving to Microsoft's Office 365 through a Hybrid Deployment. It was a complex move, but Tuor's experience helped us navigate through the projects many roadblocks and challenges, and arrive at a great solution that's meeting our needs. We couldn't have done it as quickly or smoothly without them."

**Chris Sonnemann**, Director of IT  
National Ballet

"Tuor has helped to setup our network, installed a full computer classroom, and advised us on product acquisition. Their response time has been outstanding. It's nice to know that no problem is too big or too small."

**Jack McLaren**, Director Ambercroft  
Local 506 Training Center
